DETAILED ACTION

- 1. The final rejection mailed July 22, 2005 has been withdrawn.**

Drawings

2. The drawings are objected to because figures 7 and 8 are missing. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities:

Page 20, first equation, "St" and "Sy" are not defined.

Page 20, lines 6 and 7, the phrase "averagess on the homologous outputs of each of three branches" recites averages of the outputs.

Pages 34 and 35, references should be incorporated in the body of the specification.

Appropriate correction is required.

Claim Objections

4. Claims 1-3 are objected to because of the following informalities:

Claim 1, lines 4 and 7, delete " , " .

Claim 1, line 12, delete "itself and" and insert - - said - - .

Claim 1, line 15, after "are" insert - - automatically - - .

Claim 1, line 16, delete "on".

Claim 2, x, s and r are not defined.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 1 recites the broad recitation "a high level decision system", and the claim also recites "the branches" which is the narrower statement of the range/limitation. Claim 1, line 3, the phrase "merged by a high level decision system" is indefinite because it raises the questions of what is being merged and what merged means.

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 2129

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The phrase "merged by a high level decision system" fails to recite what is being merged and what merged means (see claim 1, line 3 and specification, page 20). It is possible the first equation on page 20 is about one merge. In addition, the word "events" in claim 1, lines 10 and 14 is described as "event" in specification (see specification, page 14, line 425 and page 15, line 430).

Conclusion

7. Applicant's arguments filed September 26, 2005 have been fully considered but they are not persuasive because of new ground of rejection.
